DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-62 and 80-92, drawn to a process for treating a halogen gas, classified in class 423, subclass 240R.

II. Claims 63-68, 74-79, and 93-94, drawn to an plasma apparatus, classified in class 422, subclass 186.04.

III. Claims 69-73 and 95, drawn to a system for treating a halogen gas, classified in class 422, subclass 168.

2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II/III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed, could be performed by materially different apparatus, such as an apparatus with catalytic removal or destruction means. The apparatus could also be used to practice another materially different process, such as removal of NOx or carbonaceous contaminants.

Art Unit: 1754

Inventions II and III are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not disclosed nor claimed as used together and have different modes of operation and function, such as halogen treatment, specific electrodes, and a fresh fluid source.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Groups I-III is not required for Groups III-I, restriction for examination purposes as indicated is proper.

3. A telephone call was made to Wayne Rupert on 8/8/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently

Art Unit: 1754

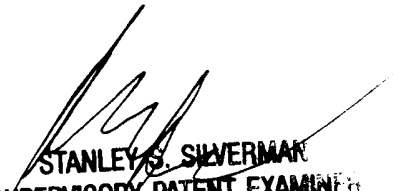

named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward M. Johnson whose telephone number is 703-305-0216. The examiner can normally be reached on M-F 6:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stanley S. Silverman can be reached on 703-308-3837.
